

WHAT MAKES XZILON DIFFERENT?

ORIGINALLY DESIGNED FOR THE AVIATION INDUSTRY

Before it was approved for the automobile industry, Xzilon was developed for use in the aviation industry utilizing “molecular adhesion” to extend paint life and help prevent environmental damages while reducing the need for maintenance and maintenance costs. Xzilon was put through extreme testing by Boeing Commercial Aviation Services and carries approvals from Boeing, Douglas Aircraft Co., Airbus, and more..

IT'S NOT A WAX - IT'S MOLECULAR ADHESION

Xzilon will perform up to 700°F. Typical auto waxes and wax-based products emulsify (or break down) off of vehicles with just the kind of surface heat that can occur on a sunny day. Our revolutionary carbon ceramic polymeric formula with graphene provides additional strength and flexibility to your vehicle's paint, protecting your investment and making it easier to care for in years to come.

TOTAL ENVIRONMENT PROTECTION

Carrying the industry's highest safety ratings, Xzilon products offer safe and comprehensive protection for your vehicle's exterior and interior surfaces beyond what the manufacturer can guarantee.

- ▶ All painted sheet metal panels
- ▶ Exterior painted plastic panels
- ▶ Headlights
- ▶ Alloy wheels
- ▶ Interior surfaces

Xzilon products help protect your vehicle from the threats it will face on a daily and seasonal basis, the threats that greatly impact your vehicle's appearance and value. Coverages include:

- ▶ Exterior etching from environmental hazards
- ▶ Interior stains and odors* caused by spilled beverages, food and grease, ink and dye transfer, and more
- ▶ Accidental interior rips, tears, and burns
- ▶ Minor dents and dings*
- ▶ Cosmetic alloy wheel damage*

ULTIMATE APPEARANCE PROTECTION

THIS IS HOW THE MANUFACTURER PROTECTS YOUR NEW VEHICLE PRIOR TO DELIVERY

Many years ago, when lead was removed from auto paint by the EPA, the paint lost luster, durability, and softness. The powder-coating paint used today is just a fraction of the thickness that paint used to be! And because it's only covered by a porous clear coat, vehicles are more vulnerable to environmental damages than ever before.

Xzilon's carbon ceramic polymeric coating with graphene covalently bonds to the external painted surfaces of your vehicle providing an advanced protection barrier and producing a clear, hard, smooth, and mirror-like surface. Containing no VOCs (volatile organic compounds), Xzilon safely restores the strength, flexibility, and elevated heat resistance that lead used to provide while maintaining its luster for years to come!

Every vehicle is new to its next owner. Protect your new vehicle from everyday threats today with

ULTIMATE APPEARANCE PROTECTION WITH XZILON PRODUCTS

XZILON'S COMPREHENSIVE VALUE PACKAGE

CARBON CERAMIC EXTERIOR PROTECTION WITH GRAPHENE

- ▶ Love bugs and other insects
- ▶ Bird droppings
- ▶ Tree sap
- ▶ Hard water
- ▶ Industrial fallout
- ▶ UV radiation
- ▶ Acid rain
- ▶ Road salt and de-icing agents
- ▶ And more!

INTERIOR PROTECTION

- ▶ Oil Stains
- ▶ Food Stains
- ▶ Beverage Stains
- ▶ Vinyl Fading
- ▶ Accidental Rips & Tears
- ▶ Accidental Punctures & Burns
- ▶ Organic Odors*

EXTRA EXTERIOR PROTECTION*

- ▶ Minor dents and dings

ALLOY WHEEL PROTECTION*

- ▶ Cosmetic damage

This brochure is not a contract. We consider new vehicles to be of current model year plus 2 years and used vehicles to be in their 3rd model year or older. Please review your product warranty for terms, conditions, and exclusions. Xzilon's product warranties require the application of a Xzilon product by the selling dealership.
