

WHAT MAKES XZILON DIFFERENT?

ORIGINALLY DESIGNED FOR THE AVIATION INDUSTRY

Before it was approved for the marine segment, Xzilon was put through extreme testing by Boeing Commercial Aviation Services.

IT'S NOT A WAX - IT'S MOLECULAR ADHESION

Xzilon is a carbon ceramic polymer with graphene that will perform up to 700 degrees. Typical waxes emulsify (or break down) with the kind of surface heat that can occur on a sunny day.
