

# WHAT MAKES XZILON DIFFERENT?

## ORIGINALLY DESIGNED FOR THE AVIATION INDUSTRY

Before it was approved for the automotive industry, Xzilon was put through extreme testing by Boeing Commercial Aviation Services.

## IT'S NOT A WAX - IT'S MOLECULAR ADHESION

Xzilon's high-performance protection will perform up to 700 degrees. Typical waxes emulsify (or break down) with the kind of surface heat that can occur on a sunny day.

## MORE DEPTH, MORE SHINE, MORE DURABILITY

Xzilon's Diamond Grade 9H Ceramic System is specifically formulated for those looking to keep their specialty vehicles in top shape. We use a 9H base coat to provide depth and shine, and add our Carbon Ceramic and Graphene formula as a top coat to enhance the durability and protection.
